PRODUCT INFO

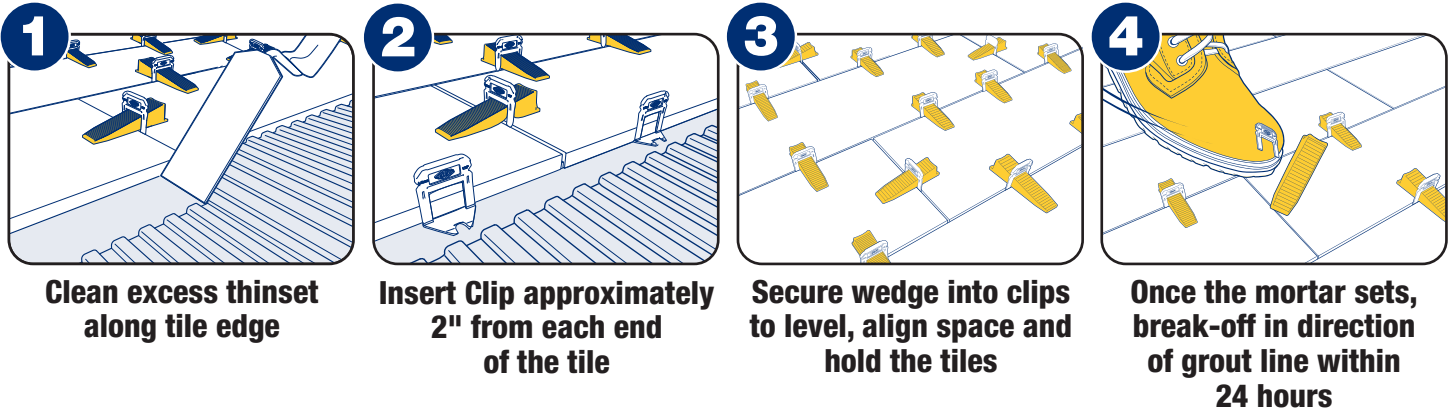

Lash XL™ is a two-part system that ensures large format tile surfaces are leveled and consistently spaced during installation. The Wedges are used in conjunction with the Leveling Clips (sold separately) to produce even grout lines and align neighboring tile delivering a lippage-free surface. The Leveling Clips are produced in 4 popular grout line widths - 1/32", 1/16", 1/8", and 3/16". For quick and easy removal, Clips are designed to break off below the surface of the tile with a simple kick in the direction of the grout line, or strike of a rubber head mallet. The Wedges can be saved and reused on the next project. Lash XL Tile Leveling System eliminates uneven tiles and delivers professional tile installation results.

Professional Tools for Professional Results

qep.com

Easy to install and remove!

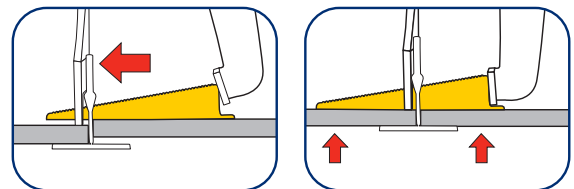

Tile Leveling System should be used with a minimum 3/8" depth trowel notch to apply the setting material. Back buttering your tile is always recommended.

PERFORMANCE

Stop pin allows for proper pressure

- Ensure wedges are set properly in the leveling clips every time (one to two clicks)
- Can also be used with the Original LASH® Tile Leveling System and most Tile Leveling Systems
