PRODUCT INFO

QEP® Tile Beater Block is designed specifically for installing large porcelain tiles. It helps firmly set tile into place. By gently tapping the tile, it eliminates air bubbles trapped between the tile and adhesive. This process is critical for achieving a level installation and eliminating voids that could compromise the integrity of large format tile assemblies. Made from durable rubber, the Tile Beater protects your tiles from damage during use. The QEP Tile Beater Block offers broader coverage at 15" x 6.75" and weighs just 3.74 lbs for easier handling without sacrificing strength.

Professional Tools. Professional Results.
